Key Messages for January 28-30 Winter Storm

Updated January 27, 2022
5:00 AM EST

Significant impacts likely in New England, with impacts possible further south along the East Coast

- A winter storm is likely to create significant impacts across New England Friday night through Sunday. Notable impacts may also extend south along the East Coast through North Carolina.
- Across New England, heavy snow and strong winds are likely which could lead to blowing snow, scattered power outages, and some damage. Additionally, significant coastal impacts are possible, including coastal flooding and beach erosion.
- Farther south along the coast, from New York City to northeast North Carolina, moderate to heavy snow is possible, but confidence in potential impacts is lower.
- This forecast continues to evolve. Please check for updates and your local forecast at weather.gov.
